

## Adding Email on your Apple iPhone Email Client

Before starting make sure that you have the following, if you don't have everything, contact technical support for any missing information:

- **Email Address** to add/make changes to
- **Username** (your full email address)
- **Password** (it is case sensitive!)

-----  
**Basic Server Setting you should have on hand prior to starting:**

### **Incoming Mail Server Settings:**

mail.frii.com  
port 993  
SSL/TLS

### **Outgoing Mail Server Settings:**

mail.frii.com  
port 465  
SSL/TLS

**OR**

mail.frii.com  
Port 587  
STARTLS

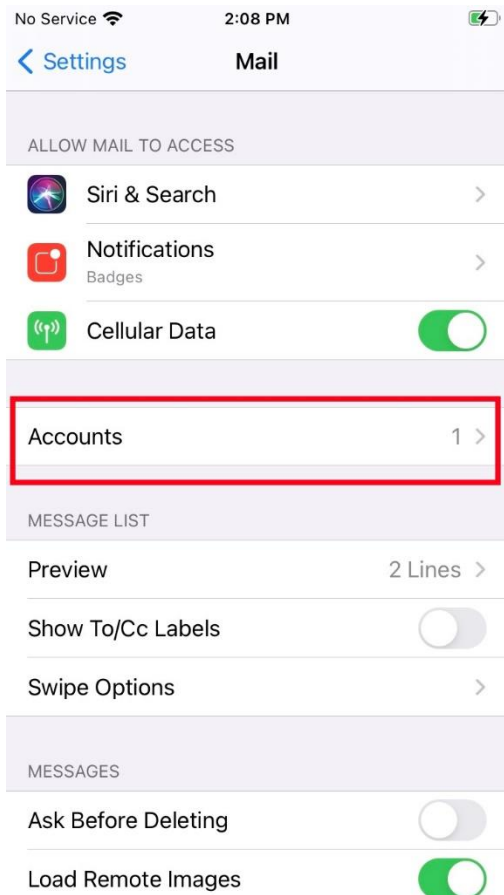

-----  
Open your **Settings**

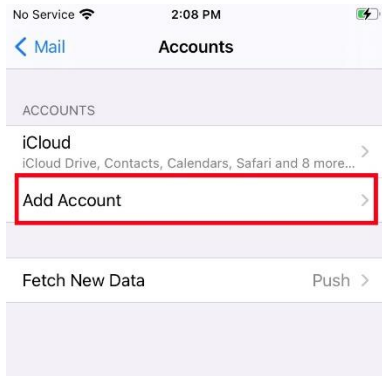

Scroll down until you find **“Mail”** and click on it (older IOS versions, select **“Mail, Contacts, Calendar”**)

Select **“Accounts”** or **“Add Accounts”**

Select **“Add Account”**

Select **“Other”**

Select **“Add Mail Account”**

Enter your **Name**, **Full Email Address**, **Password** and write a short **Description** that will help you identify the email account in case you plan to have more than one email address added and accessible by your iPhone. Click **“Next”**

The screenshot shows the 'New Account' screen in the Mail app. The status bar at the top indicates 'No Service' and the time is 2:01 PM. The screen has three buttons at the top: 'Cancel', 'New Account', and 'Next'. Below these are four input fields, each with a label and a value:

Name	Your Name Here
Email	sampleemail@frii.com
Password	TYPE YOUR PASSWORD HERE
Description	Identifying Account Info

At the bottom of the screen, a keyboard is visible. The suggestions bar shows three options: 'Info', 'Information', and 'Informed'. The keyboard has a standard QWERTY layout with a space bar and a return key.

On the IMAP screen some things will auto populate. There will be some things you need to fill in:

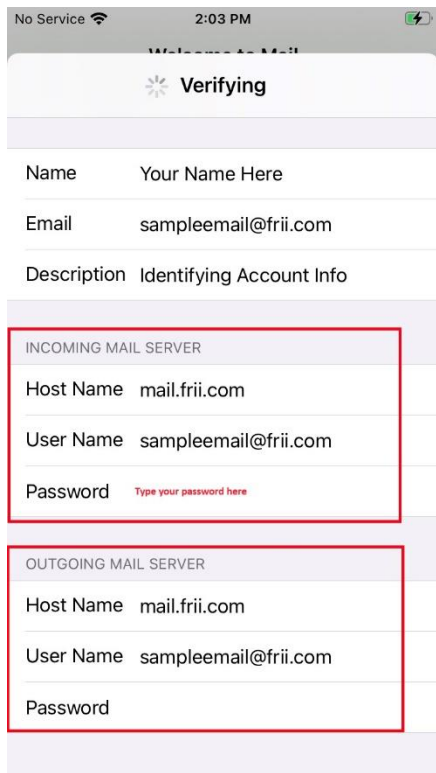

**Incoming Mail Server section**

**Host Name:** mail.frii.com

**Username:** Your FULL email address

**Outgoing Mail Server section**

**Host Name:** mail.frii.com

Click **“Save”**, and exit out of the **“Settings”**

On your home screen, select the **“Envelope”** and your email will be populating there.
